

# Hangar Floor Cleaner

## Product description

Hangar floor cleaner is highly concentrated alkaline based cleaning product for efficient removal of dirt, mineral and synthetic grease, brake fluid, aircraft piston engine oil, turbine oil and rubber marks on hangar floors. Hangar floor cleaner can safely be used on most common floor surfaces (ceramics, concrete, epoxy and polyurethane coatings,...).

## Properties

- Physical state at 20°C: Liquid
- Colour: Colourless to light yellow
- Odour: Characteristic
- pH value: 12,0 – 13,0
- Boiling point (°C): 100°C
- Density: 1,12
- Solubility in water: Complete

## Packaging

Available in 5 liter can.

## Application

Dilute the hangar floor cleaner with water 1:10 up to 1:20. Spread the product with a soft brush or low pressure sprayer. Wait for at least 5 minutes before further cleaning in order to give the hangar floor cleaner the necessary penetration time. Rinse with water to remove traces of the product. To confirm the resistance of the floor surface, test the hangar floor cleaner on a small surface. Hangar floor cleaner cannot be used to clean aircrafts, aircrafts or helicopters!

## Safety

- Review the Material Safety Data Sheet (MSDS) before use.
- Shelf life: 36 months
