

## De-Ice Boot Care Products

### THE DURABILITY YOU WANT

Age Master® #1 is a rubber protective agent that penetrates and chemically bonds with Neoprene rubber to provide outstanding protection against sunlight, weathering, ozone, oxidation and pollution. This coating won't wash off and enhances the durability of your aircraft's rubber material.

#### Application

- Every 150 flight hours (twice yearly)
- One quart covers approximately 90 sq. feet

Age Master #1

### THE PROTECTION YOU NEED

Icex II™ has been specifically formulated to enhance de-icer performance without harming the environment. Icex II chemically bonds with the surface ply of de-icers to boost performance by making de-icers slippery and shed ice faster.

#### Application

- Every 50 hours during icing season
- One quart covers approximately 400 sq. feet

Icex II

### THE LOOK YOU LIKE

ShineMaster™ offers de-icers a lustrous shine and cosmetically enhances de-icers by coating the exterior surface. This cosmetic treatment is easy to apply, dries quickly, and provides a long-lasting shine.

#### Application

- Two to three light coats
- One pint covers approximately 200 sq. feet
- Reapply as desired

#### ShineMaster Prep

ShineMaster Prep is a deep-cleaning surface treatment that prepares de-icers for the luster provided by ShineMaster.
