

Hard Surface Interior Disinfectant

AMS 1452 and Boeing D6-7127 certified

Product description

Aero-Sense Hard Surface Interior Disinfectant is a cleaning and disinfecting agent for hard surfaces in the aircraft including: trays, toilet compartments (basins, toilets and surroundings), galleys, cabins (bulkheads, drop-down tables, etc.), armrests...The non-corrosive formulation is safe for use on a broad range of surfaces in the aircraft: metals (aluminium), plastics (acrylic, polycarbonate, polysulfone), (un) painted surfaces, rubber, vinyl and Tedlar® surfaces. The Hard Surface Interior Disinfectant is compatible with the Hard Surface Interior Cleaner (step 2 of 2).

Aircraft cleaning and disinfection is recommended by the International Health Regulations of the World Health Organization (WHO). While cleaning refers to removal of visible dirt and/or particles, disinfection refers to control, deactivate or kill bacteria and viruses which can cause diseases, infections, ...

Aero-Sense Hard Surface Interior Disinfectant is AMS 1452 and Boeing D6-7127 certified.

Properties

- Physical state at 20°C:	Liquid
- Colour:	Colourless
- Odour:	Characteristic
- pH value:	± 7,0
- Solubility in water:	Completely
- Boiling point:	± 100°C
- Flash point:	≥ 100°C

Packaging

- Ready-to-use product in a 750 ml spray bottle
- Concentrated liquid in 5L and 20L cans and 200L barrel

Certification

AMS 1452B and Boeing D6-7127 certified product

Application

- Concentrated liquid: dilution rate: 1:20
- Simply spray the ready-to-use/diluted product on the washable surface and clean with an (anti-static) cloth.
- No rinsing required

Safety

- Review the Safety Data Sheet (SDS) before use.
- Shelf life: 12 months (ready-to-use) – 24 months (concentrated liquid)
