YOUR RELIABLE PARTNER IN AVIATION CHEMICALS

Aero-Sense®

WE ARE PROUD TO BE

YOUR RELIABLE PARTNER IN AVIATION CHEMICALS

WE KNOW
YOUR BUSINESS

Whether you're an aircraft owner, working at an FBO or as a procurement manager at a world class airline, you've come to the right place. We have the products, knowledge and experience to help you find what you need and get it shipped to your doorstep.

From small, urgent de-icing requests to multi-year tender bids, our staff are qualified to assist. Get in touch and we're guaranteed to find the right solution for your product needs. We are your reliable partner in aviation chemicals, whatever your company's size.

"We are honored to be working with Aero-Sense®. They have a great local knowledge, and a very good range of products."

MIKAEL ROSÉN, RAMP MANAGER AT GRAFAIR JET CENTER FBO

01

SERVICE

The heart of our business is our customer service. Our ambition is to provide an outstanding customer experience by continuously improving the quality of deliveries and customer service. We proactively follow up and closely monitor all orders to prevent any potential issues ahead of time.

You will receive a personalised response within 24 hours and can place orders via our online shop 24/7.

02

QUALITY

We stand for premium quality, aviation certified and thoroughly tested products. Every delivery comes with the right certificates and dedicated follow-up. All production activities conform to European standards and regulations, using only fully traceable raw materials, and including a priority focus on sustainability.

Aero-Sense® operates a Quality Management System in compliance with ISO 9001:2015.

03

STOCK

We provide rapid response to customer needs thanks to our first-rate stock management. Even in the harshest winters, we're ready to deliver the de-icing products you need. Headquartered in Belgium, our position at the heart of Europe provides us with excellent access to all major transportation.

Our ERP system enables us to strictly monitor stock levels, shelf life and certification at all times.

AIRCRAFT INSECTICIDES

Aero-Sense® Aircraft Insecticides are used to control flying and crawling insects and prevent the spread of vector-borne diseases harmful to humans, plants and/or animals. Aircraft Insecticides can be used for both cabin and cargo hold disinsection of passenger and freighter aircraft.

AIRCRAFT INSECTICIDES

ASD Aircraft Insecticide

ASD Aircraft Insecticide is a non-flammable aircraft insecticide formulated according to WHO recommendations and based on the active substance 1R-trans phenothrin. It is used for inflight cabin disinsection based on the WHO recommended 'Blocks away' or 'Top-of-descent' spraying disinsection procedures. The environmental impact of Aero-Sense® aircraft insecticides is over 1,000 times lower than that of the market alternatives and is the only product available that is fully compliant with the European regulation on fluorinated greenhouse gases.

CERTIFICATION

AMS 1450
Belgian National Authorization
> No: 10014B
Swiss Registration
> No: CHZA0005

AVAILABLE IN

- 40 g one-shot / multi-shot
- 60 g one-shot / multi-shot
- 100 g one-shot / multi-shot

ASP Aircraft Insecticide

ASP Aircraft Insecticide is a non-flammable aircraft insecticide formulated according to WHO recommendations and based on the active substance permethrin. It is used for pre-flight cabin disinsection according to WHO recommended 'Pre-flight' or 'Pre-embarkation' disinsection procedures. The environmental impact of Aero-Sense® aircraft insecticide is over 1,000 times lower than that of the market alternatives and is the only product available that is fully compliant with the European regulation on fluorinated greenhouse gases.
